Connectivity

Connect to the fastest and most robust network in Latin America with access to local content and high-quality service.

Connectivity

EdgeUno has over 50 strategically distributed POPs (Points of Presence) at a regional level to bring our clients closer to the Latin American market, in addition to managing more than 3000 private peering networks.

EdgeUno offers the following services:

- Connectivity (100 Tbps Backbone and Point to Point Services).
- Colocation (rack space and power).
- Professional network services.
- Protection against DDoS attacks.

Characteristics

- Our Connectivity services include:
 - A unified platform where:
 - Access to all contracted services by the client is simple and efficient, all from one place.
 - Resource consumption for each client, ticket logs, and billing are visualized.
 - Configuration with high availability.
 - The lowest market latency.
 - Connection with 23 IXs in Latin America
 - Point-to-point services such as:
 - EPL (Ethernet Private Line)
 - Metro Wave
 - Security services to protect Internet services against DDoS attacks and through configurations such as BGP FlowSpec.
 - Guaranteed SLA (Service Level Agreement) for each product.
 - Our services have Dual Stack.
 - Ability to total the consumption of burstable services distributed in different regions, to offer better rates.

Benefits

- Automated BGP prefix release for customers.
- Network built with access to different cable systems to cover the same route.
- Proven experience in deploying and operating complex infrastructure projects to drive expansion.
- Assignment of a Project Manager as a Single Point of Contact (SPOC) for initial deployment and daily operation.
- Backbone deployed in Latin America with the best connectivity services.

EdgeUno offers its clients turnkey solutions with low implementation times, low latency, highly redundant services, and the best quality in the market, all managed from our NOC (Network Operations Center) with 24/7/365 attention.
