

edgeuno

AS7195

# Connectivity

Connect to the **fastest and most robust network in Latin America** with access to local content and high-quality service.

# Connectivity

EdgeUno's connectivity infrastructure is a leader in Latin America, providing optimal access to streaming content, video games and real-time applications with the lowest latency over the most diverse and available network in Latin America.

## Our services:

- **IP Connectivity with DDoS Mitigation**
- **EPL**  
(P2P connectivity between 20+ cities)
- **Wave**  
(Metro, National and International)
- **Cloud Connect**  
(Connection to AWS, Azure, Google and Oracle clouds)

## Features

### Our Connectivity services include:

- Redundant network topology with no single points of failure connected to the main submarine cables.
- P2P Wave and EPL connection with flexible bandwidths between more than 20+ cities throughout the Americas.
- Connection to the most extensive regional network of local content in Latin America.
- Connection to the most important Exchange Points (IXs) in Latin America and the world.
- Presence in the main Datacenters in the region, guaranteeing different service delivery points.
- Access to customer portal to manage contracted services, view traffic graphs, create and track tickets and review billing.
- Full in-country coverage through national transportation and last mile services.
- Support of IP connectivity in Burstable mode, with the possibility of delivery on 10/40/100Gbp ports.

## Benefits

- The best latency on the market for streaming services, video games, and real-time applications.
- Our AS7195 is ranked No.1 in the Ranking Caída as the best connected in Latin America.
- Assign a project manager as the single point of contact for solution implementation.
- Extensive experience in deploying and operating complex infrastructure projects to drive expansion.
- The best implementation times, with ONNET solutions deployed in just 5-7 days.
- Automation of BGP prefix release for our customers.

## Points of Presence in Latam

**EdgeUno** offers its clients turnkey solutions with low implementation **times, low latency, highly redundant services, and the best quality in the market**, all managed from our NOC (Network Operations Center) with 24/7/365 attention.

***The World's most connected  
Latin American Network***
