Made in Latin America

# The World's **most connected** Latin American Network

## Connectivity

The ultimate connection to Latin America – faster, more robust, and closer to the content that matters most.

# Connectivity

EdgeUno's connectivity infrastructure is a leader in Latin America, providing optimal access to streaming content, video games and real-time applications with the lowest latency over the most diverse and available network in Latin America.

edgeuno

## Features

**Redundant network topology** with no single points of failure connected to the main submarine cables.

**P2P Wave and EPL connection** with flexible bandwidths between more than 20+ cities throughout the Americas.

**Connection to the most extensive regional** network of local content in Latin America.

**Connection to the most important Exchange Points (IXs)** in Latin America and the world.

**Presence in the main Datacenters in the region**, guaranteeing multiple service delivery locations

**Access to customer portal to manage contracted services**, view traffic graphs, create and track tickets and review billing.

Full in-country coverage through **national transportation** and **last mile services.**

**Support of IP connectivity** in Burstable mode, with the possibility of delivery on **10 / 40 / 100 / 400 GbE ports**

## Bottom section

**Best Latency**
The best latency on the market for streaming services, video games, and real-time applications.

**Number 1**
Our AS7195 is the N° 1 Latin American network according to CAIDA's Ranking

**Single Point of Contact**
Solution implementation with a single point of contact project manager assigned.

**Implementation time**
The best implementation times, with on-net solutions deployed in just 5-7 days.

**Experience**
Extensive experience in deploying and operating complex infrastructure projects to drive expansion.

**Automation**
Automation of BGP prefix release for our customers.
